

THE HELP GROUP'S  
**WESTVIEW**  
School of Arts & Technology

**See the world  
in a new light**

**Promoting student engagement  
through a guided, innovative curriculum  
in a therapeutic, inclusive atmosphere**

## Academics & Beyond

With an elective focus on arts and technology, we provide college preparatory education in a caring and therapeutic learning environment.

## Therapeutic Model

Using the therapeutic principles of the Neuro-sequential Model of Education (NME), we develop students' emotion regulation strategies and techniques.

## Kaleidoscope Program

For LGBTQ+ youth, we offer a safe, inclusive and affirming environment that allows students to explore and embrace their identity while building positive social connections.

At Westview School of Arts & Technology, developing successful students begins with an emphasis on educating the whole child. We incorporate an innovative educational model combining traditional, therapeutic, and practical skills preparing students who need extra support with the confidence and competency to thrive in today's diverse global community. With access to advanced technology in the classroom, including our cutting-edge innovation lab and our exciting visual & performing arts programs, our students have the opportunity to brainstorm, think differently, and find their individual voice and purpose.

Applications are accepted year-round for students grades K-12.
